. The Eerie Adventures Of Kally Teaser:

<https://www.youtube.com/watch?v=OMqZIBn6mEY>

Hello everyone! Before start with this.. Apologies to all because of my silent development routine, i wasn't too connected to Steam while developing this update.

Finally, after months of work i can bring you a fully playable experience without serious problems that ruin your progress.

I will bring the patch changes after the trailer launch "it's very close", thanks to everyone for the patience and motivation to keep working in this game.

Have fun! 🤪

. Friday Patch Notes v. 1.1.0:

In this patch, we focused on the stability of the game and visualization of the data needed for running a company.

New feature - **Accounting**

You can now see when and how your company's money is spent tapping on your wallet in the header.

Bug fixes including:

- The menu is opened on launch (instead of the last save played)
- Broken achievement fixed
- Done percentage display fixed

-
- Removing projects with NaN deadline or reward
 - You can now disable animations to avoid freezes on the late stages of company growth

We're still aware of this list of this list of issues and will fix them in the next patches:

- The happiness of the employees found with Hiring Agency is lowered by the fact that they instantly require a pay raise
- Issues on old machines on Linux OS

Please use a hotkey "Cmd/Ctrl + Shift + O" to refresh the game in case you've got an error that crashes it.

Thank you for the reports in discussions, they help a lot!

Stay tuned,

Black Deck Crew. **Last day of the sale!:**

Don't say I didn't warn ya'!

The weeklong release party 20% off sale ends today. Don't be the only kid on the block without ETL!

Remember I have some cool things coming for the game, to be retroactively rolled into each copy via the Steam Updater. And because I didn't make No Man's Sky I actually deliver on my promises 😁
